COMPATIBLE WITH **SOLUM's** NEWTON ESL's

**PRO • CORE • LITE**

# SHELF PROFILES

In this catalogue, you will find the widest assortment of profiles for the different types of shelves on the market. We keep a permanent stock of all referenced models in 985 and 1315mm lengths and in transparent and black colors. All our profiles are one-piece; that is, they are inserted directly into the front of the shelving without the need for assemblies or other manipulations. If the profile you need is not in this catalogue, we can develop it in a short period of time.

## INDEX | EXTRUSION PROFILES FOR NEWTON ESL

NEWTON INDUSTRIAL

**Manufactured from high-quality PVC**, our electronic label profiles offer a durable, resilient, and visually adaptable solution for retail environments. Available in solid colors and transparent finishes, they ensure seamless integration with shelving and commercial displays.

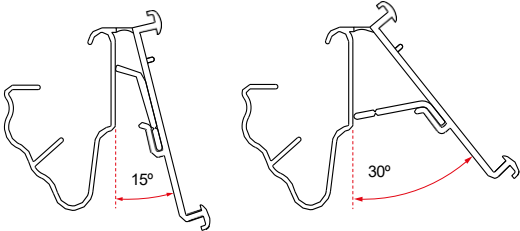

**Secure and precise attachment to various shelving systems**, enabled by the rear section design of the profile, optimized to fit the wide range of configurations found in the retail environment.

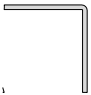

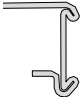

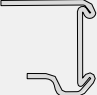

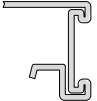

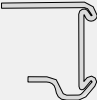

**The flip-open system** allows quick insertion and replacement of electronic labels, reducing operational time. It also enables tilt adjustment through additional accessories, improving price visibility on shelves at different heights (available in select models).

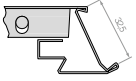

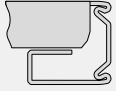

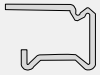

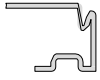

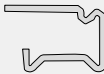

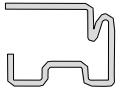

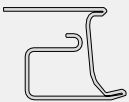

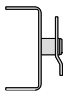

**Soft PVC filament** located on the front. It acts as a flexible retaining band that ensures a secure fit of the label, preventing accidental displacement.

**With a dedicated 'angulator holder' section**, allowing the profile to tilt at 15° or 30°, depending on display requirements (Available in select models).
